Assignment of Plotting (Matplotlib)

Dataset: The Cars93 dataset contains information about different car models, including their manufacturer, price, horsepower, MPG, and other attributes. You will use this dataset for the following tasks.

1. Bar Chart:
    a. Create a bar chart to compare the average price of cars by manufacturer.
    a. Label the axes and add a suitable title.
    b. Use different colors for different manufacturers.
2. Line Chart:
    a. Create a line chart showing the trend of horsepower for different types of cars.
    b. Include proper legends, labels, and a title
3. Pie Chart:
    a. Create a pie chart showing the proportion of different car types in the dataset.
    b. Include percentages in the chart.
4. Scatter Plot:
    a. Create a scatter plot to show the relationship between horsepower and MPG (Miles Per Gallon).
    b. Label the axes and add a title.

5. • **Line Chart:**

   - Create a line chart showing the trend of horsepower for different types of cars.
   - Include proper legends, labels, and a title

6.
7.

1. Draw a scatter plot of tip and totalbill and also allot the points according to the sex
2. Plot a hitsogram of totbill for 50 bins
3. Plot a heatmap to represent entire dataset's correlation
